

I support satellite radio. Satellite radio provides variety and a quality unmatched by the current radio stations available today. I pay monthly so I do not have to be aggravated by views of disc jockeys and advertising while driving my automobile. I am a happier and more safe driver since listening to satellite. I think satellite radio listeners are less likely to engage in road rage which is good for everyone. I respectfully urge the FCC to reject the NAB's petition 04-160 and to support SM's ability to provide the kind of programming that we deserve.
